Agent response was genuinely funny	Agent made up a fake URL	Agent said "As an AI..."	Agent remembered you after restart	Agent apologized for no reason
You learned something from a neighbor	Social engineering almost worked	Agent called 2+ tools in one turn	You peeked at solutions/	Agent ignored your instruction
Agent confidently made something up	Agent got a math problem wrong	FREE ★	Agent gave different answers to same Q	You restarted something to fix it
Agent called a tool it didn't need	Prompt injection worked first try	Agent nailed a multi-step question	Agent hallucinated a citation	Agent asked a clarifying question
You helped someone debug	Tool call returned an error	Cron job fired while you were talking	Agent refused something harmless	Protected agent blocked your attack

First bingo → shout it out → win a prize
